E-GOVERNMENT PROCUREMENT (e-GP 2.0)
FREQUENTLY ASKED QUESTIONS AND ANSWERS

General

1. What is e-GP?

e-GP (Electronic Government Procurement) is the procurement and disposal of public supplies, works and services through the internet.

2. Why e-GP?

To improve efficiency and effectiveness in public procurement and disposal processes.

3. What are its benefits?

- Increased transparency in procurement and disposal processes.
- Eliminates corrupt tendencies due to less physical interactions.
- Accountability.
- Increased accessibility to procurement opportunities.
- Reduced bidding costs.
- Reduced administrative and response time.

4. When will the e-GP start in Makindye Ssabagabo Municipal Council?

It started in the Financial Year 2026/2027.

5.. Will the system be accessible by the public?

Yes. This is a public system and will be accessed by the public and whoever is interested in government business.

6. How will the system work?

It is an internet-based system that will require all users to have access to reliable internet services.

7. Will there be training for the public?

Yes. All system users will be trained using various training materials. Currently all providers are trained on every Thursday of the week. We shall be sharing the link.

8. Which government agencies are using e-GP 2.0 ?

The project will be piloted in a phased approach with the 100 entities:
(i) The other entities will be brought on board later.

9. Will it be mandatory for government entities and bidders to use e-GP 2.0 ?

Yes, all government Ministries, Departments and Agencies will be required to conduct their procurements and disposals on the system. All bidders will be required to transact on the system.

System use and procurement processes

10. Will invitations for bids be advertised in the newspaper alongside the electronic system?

Newspaper advertising will be optional. However, it will be mandatory for invitations for bids to be placed on the system.

11. How will system failure be managed at crucial stages like bid submission?

System failures related to bid submission will be handled by the responsible personnel on a case-by-case basis.

12. Will evaluation of bids be done on the system?

Yes. All bid openings and evaluations will be done on the system; the bids will be evaluated using the system.

13. How will Contracts Committee approvals be done on the system?

Contracts Committee members will log into the system to approve or reject submissions made to them by the Procurement and Disposal Unit.

14. Will there be need for electronic signatures?

Yes. Digital signatures will be needed. However, initially, individual user logins and approvals within the system will be used, and electronic signatures will be introduced later.

15. Will the system be accessed on mobile phones?

Yes. Users will be able to access and view information on the system using internet-enabled mobile phones.

16. Will the system allow for clarifications before the bid submission deadline?

Yes. Bidders will be allowed to submit requests for clarification through the system before the bid submission deadline, and the response will be shared with all shortlisted bidders.

17. Will the system allow the bidder to withdraw bids / make any changes to the bid document on e-GP?

Yes. The system will allow bidders to withdraw their bids, make changes and re-submit. However, this flexibility is only applicable if the deadline for bid submission is still open.

18. Will the system use PPDA's standard forms and SBDs?

Yes. The system will use PPDA standard forms and SBDs, but they will be much more simplified.

19. How will bidders be notified in the event that there is system downtime at the bid submission deadline?

Bidders will be notified by system-generated email and SMS notifications in the event of system downtime.

20. How will contract management be managed on the system?

The system has an e-Contract Management module through which contract implementation will be planned, monitored and recorded. Where deemed necessary, physical site visits will be conducted.

21. Will there be training for suppliers?

Yes. Suppliers will be reached and trained in their respective regions of operation.

22. How will the general public be sensitised on the use and benefits of e-GP?

Sensitisation will be through different media, including radio and TV, newspapers, social media, seminars and conferences, among others.

23. How will the media and non-state actors that are not directly part of the procurement process be able to track what is happening with government procurements?

The system will have a "Guest Access Viewing" platform that will enable members of the public to access government procurements.

24. Will PPDA have contact centres in the districts to help users, bidders and entities in the utilisation of the system?

Yes. MoFPED together with PPDA, will have contact centres in different regions to attend to general public and bidder concerns with the system.

25. Will government save by adopting the system?

Yes. Savings will be realised by adopting the system.

26. Will bidding fees in the system be uniform?

Bidding fees will be determined by the relevant authorities.

27. Will payments be made on the system?

Yes. Payments will be made through the e-payment gateway interlinked to the e-GP system.

Policy, legal framework, internet and security

28. Is e-GP within the public procurement legal framework?

Yes. The e-Government Procurement system is built around the current procurement legal framework. It is also flexible to cater for future changes in the law.

29. How will e-GP eliminate corruption in public procurement?

The system will increase transparency and improve accountability of practices and procedures, thereby reducing corruption.

30. Will bidders be allowed to submit bids outside the system?

No. All procurement and disposal submissions will be done through the system.

31. Will supplier payments be made through the system?

No. Payments to suppliers will be made using the Financial Management Systems of the respective entities. These will be integrated with e-GP.

32. Will there be need to be pre-qualified by multiple government entities?

No. There will be a central registration for all potential providers on the system.

33. How will suppliers register on e-GP and what will the requirements be?

Suppliers will self-register on the e-GP system.

34. Will government provide internet to users of the system?

No. Users will be responsible for obtaining their internet through the various Internet Service Providers (ISPs).

35. How will government entities without internet connectivity procure using the electronic system?

Government's position is that all entities embrace electronic procurement.

36. How will bidder information be protected through the open online bidding process?

The system will encrypt all submitted bids, and they will only be accessible at the time of opening.

37. Is the system going to replace other systems like GPP with PPMS?

The e-GP system will accommodate these other systems.

38. Will suppliers be required to register with the PPDA's Register of Providers (RoP) to use e-GP 2.0 ?

The RoP will be embedded in e-GP 2.0 ; therefore, suppliers will register through e-GP.

39. Will government train internet cafes and certify them? If so, will it cater for risks of profiling them?

The Government of Uganda cannot take liability for bidders transacting with internet cafes.

40. Will the system provide room for the old way of doing things given the audience is not computer literate?

The old system is going to be replaced by e-GP 2.0 .

41. Some procurements require delivery of samples. How will this be handled on the system?

Where samples are required, suppliers will be called upon to bring them physically.

42. How will sustainability of e-GP be handled?

There is in-house support; however, the vendor will undertake knowledge transfer to help solve some issues. The Government of Uganda also has a sustainability plan for the e-GP system.

43. Will Local Governments, their sub-counties and divisions also be required to procure and dispose through the system?

Yes. All government Ministries, Departments and Agencies, including Local Governments, will be required to procure and dispose through the system, **however for Makindye Ssabagabo Municipal Council its divisions shall not transact through the E-gp 2.0 currently.**
